DETAILED ACTION

1. Formal Matters

A. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, drawn to a method of treating an inflammatory skin disease in a mammal, classified in class 514, subclass 2.

Claims 6 and 7, which appear to be duplicates, recite Flk1 and Flt4. Applicants are required to elect one sequence.

Furthermore, claim 8 recites numerous independent and distinct VEGF antagonists. In order to be fully responsive, Applicants must elect one VEGF antagonist to be examined.

This is not an election of species. Each VEGF antagonist and receptor is independent and distinct from the others.

B. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter as defined by MPEP § 808.02, the Examiner has *prima facie* shown a serious burden of search (see MPEP § 803). Therefore, an initial requirement of restriction for examination purposes as indicated is proper.

C. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR § 1.48(b) and by the fee required under 37 CFR § 1.17 (h).
